DETAILED ACTION

Response to Amendment

1. Amendment filed April 22, 2003 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 12, 15, 18, 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Popp (6,460,785).

Popp discloses a fuel injector comprising: a substantially tubular retainer 38; a nozzle housing 58; a nozzle shank 40; an interference fit (column 4, lines 50-51); a nozzle sleeve 36.

Claim Rejections - 35 USC § 103

4. Claims 13, 14, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Popp (6,460,785).

With respect to claims 12, 15, 18, 19 and 20, Popp discloses a fuel injector comprising: a substantially tubular retainer 38; a nozzle housing including a nozzle shank 40, 58; an interference fit (column 4, lines 50-51); a nozzle sleeve 36. Popp differs from what is being claimed in the nozzle housing having an integral nozzle shank. Popp discloses a two piece nozzle housing and nozzle shank (40,58). It would

have been obvious to one having ordinary skill in the art at the time the invention was made to have provided an integral nozzle housing and nozzle shank to reduce the number of elements for simplification of assembly, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *In re Larson*, 340 F.2d 965, 968, 144 USPQ 347, 349 (CCPA 1965).

With respect to claims 13, 14, 16 and 17, Popp discloses the limitations of the claimed invention with the exception of the ranges of the interference fit. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided an interference of 0.001 to 0.0006 inch for optimization dependent on application criteria, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Response to Arguments

5. Applicant's arguments filed October 6, 2003 have been fully considered but they are not persuasive.

In response to applicant's argument that Popp does not suggest that the interference fit is not positioned to prevent combustion gas from entering the space between sleeve 58 and sleeve 36, this issue has been fully addressed in the prior Office action.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. Kim whose telephone number is (703) 308-8336. The examiner can normally be reached on Monday - Thursday, 6:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Y. Mar can be reached on (703) 308-2087.
